TECHNICAL DATA SHEET

ACR/300X

Pigment concentrate designed for wood impregnation by immersion.

Main Features:

- 1. Water-based formulation optimized for immersion and timber-dip systems.
- 2. Low viscosity for fast, deep penetration into wood fibers.
- 3. Highly stable pigment dispersion with no settling during continuous circulation.
- 4. Provides uniform, streak-free coloration on all wood species.
- 5. Designed for short immersion cycles and fast drainage.

Applications:

- 1. Construction timber impregnation using industrial dip tanks and immersion lines.
- 2. Industrial wood processing for pre-coloring beams, boards, and profiles.
- 3. Mass timber production treating cladding, shutters, and structural elements via immersion systems.

Technical Specifications & Typical Values

Binder Type	Acrylic
Colour	Available in Green or Brown .
Diluent	Water
Density at 22°C (ISO 2811)	1.20 Kg/L
Solids %w/w	55%

Technical Specifications & Typical Values

Method	Timber impregnation using industrial dip tanks and immersion lines

TECHNICAL DATA SHEET

ACR/300X

Pigment concentrate designed for wood impregnation by immersion.

Products Description:

The acrylic wood-impregnation pigment **ACR/300X** is a mixture of colourants used in timber impregnation using industrial dip tanks, giving the wood the characteristic brown/green tint commonly seen in exterior-grade impregnated timber (such as posts, structural wood, fencing, etc.).

The product contains specially selected, highly durable brown/green pigments dispersed in water, which penetrate deeply into the wood during the impregnation process (in autoclave or open-tank systems), without forming a film or altering the natural texture of the wood.

Packaging:

Plastic container: **11-L**

IBC: **1000-L**

Storage:

Shelf life: 12-24 months from the date of production, in original unopened packaging in a cool and dry condition between +5°C and +35°C. Protect from direct sunlight, heat, temperature extremes, and moisture. Protect from frost. Failure to comply with the recommended storage conditions may result in premature deterioration of the product packaging and which may cause inconsistent workability, finish and cure times of the material.

Health, Safety & Environment:

Read the product label carefully before use. The Technical Data Sheet should be read in conjunction with the Safety Data Sheet.
